Shade nets for Car Ports

Shade structures have become a viable option to provide fabric shade solutions in place of traditional methods of steel, wood, canvass and carports. The key difference that shade structures offers is that we use UV stabilized polyethylene shade netting resulting in maximum benefits for outdoor shade applications.

- Blocks up to 98% of the sun's harmful UV rays
- Shade canopies are 80% water repellent
- Class A fire rating on the shade netting
- Fabric canopies are made from UV stabilized polyethylene repels bacteria does not fade, mildew or rot
- Netting is porous allowing hot air to escape creating cool cushion underneath
- Shade netting is stentored to avoid sagging
- Guarantee the longevity of fabric structures for 10 years
- Shade structures will withstand high winds from 80-120 miles per hour.
